## WORK EXPERIENCES

- Software Developer / Data Scientist **Children's Hospital Los Angeles**  **Jan 2021 - Oct 2023 (part-time before 2022)**
- Machine Learning research and software development focused on EEG and signal processing.
  - Developed machine learning based pipelines that analyze and remove noise from infant EEG data using methods like Signal Processing (blind source separation), Computer Vision (movement analysis), resulting in up to 90% correct noise removal when compared to visual noise inspection results.
  - Built in-house and contributed to open source projects like EEG IO tools, participant recognition and tracking systems, and graphical data editing interfaces that help with the main project.
- Python / Signal Processing / Computer Vision / TensorFlow / EEG / MatLab
- Software Developer Intern **Royal Bank of Canada, Amplify**  **May 2021 - Aug 2021**
- Built the first end-to-end YAML-configured monitoring deployment tool on RBC's Site Reliability Engineering team to help increase its monitoring coverage and operational efficiency.
  - Automated tasks like Prometheus onboarding using Consul and deploying Grafana dashboard templates for tools like MongoDB using Jsonnet with an 86% stack coverage.
  - Key contributions: configuration generator, deployer, YAML processor, and UI components.
- JavaScript / Python / Flask / React / Kubernetes / IaC / Jsonnet / Docusaurus
- Teaching Assistant **University of Southern California, CS@SC**  **Jun 2020 - May 2021**
- Taught Python, Java, and Web development to students of different levels from middle/high school.
  - Helped students understand programming concepts and debug their code.
  - Created unit tests for student assignments, wrote quizzes and review questions for the students.
- Java / JavaScript / Python

## EDUCATION

- 2019 - 2022 **University of Southern California** **B.S. - Computer Science**
- GPA: 3.8/4.0
- Software Development, Advanced Data Structures & Algorithms, Operating Systems & Networking, Computer and Network Security, Computer Architecture, Computer Organization, Machine Learning, Artificial Intelligence, Probability Theory, Linear Algebra, Calculus, Discrete Math

## PROJECTS

- Personal Project Full Stack **Shopper**  **Since Oct 2023**
- Purpose: one-stop solution for comparing grocery prices across different places.
- Built a web app that compares grocery prices from different stores and retailers. Supports unit price conversion and comparison. Features reactive front end built with Svelte.
- Svelte / JavaScript / Go / SQLite / Cloudflare Workers
- Personal Project Android & Back end **"KnockKnock"**  **Since Oct 2018**
- Purpose: video conferencing app with unique features that suits my needs.
- Built a WebRTC based video conferencing app with features like real-time captioning, language identification, noise-canceling, and manual camera controls. Used Machine Learning for audio/image processing.
- Android / Kotlin / Java / WebRTC / Python / Firebase / PHP / C++ / TensorFlow
- Project Lead Full Stack **GreatFinds**  **Sep 2020 to Nov 2020**
- Software Development class final project, a platform that allows users to share all kinds of media content. Utilized the Java EE stack to develop server-client platform. Built the project structure with core components like JPA (database) and JSF. Led and coordinated efforts among all group members.
- Java EE / JSF / JPA / MySQL / JavaScript
- Personal Project Cross Platform **Decide for Me**  **Aug 2022 - Oct 2023**
- Purpose: let the computer decide on places like restaurants for me to avoid making hard decisions.
- Built a cross-platform Flutter app that can pick places for the user randomly, weighed by ratings, using Yelp's Fusion API. Supports filters based on location, distance, price, rating, hours, and more.
- Flutter / Dart / JavaScript / Riverpod / Android

For more on my projects, visit [jackzhang.me/projects](http://jackzhang.me/projects) .

## SKILLS (IN APPROXIMATE PROFICIENCY ORDER, MOST TO LEAST)

**Languages:** Python, JavaScript, Java, C/C++, Kotlin, Go, SQL, PHP, Bash, MATLAB.

**Frameworks/Tools:** Android, Node.js, React, Svelte, Flutter, Flask, TensorFlow, Firebase, Java EE, MySQL, GCP, WebRTC, CI.

## ACTIVITIES/HOBBIES

Machine Learning  
ACM  
Hackathons (e.g. HackSC, HackMerced)  
Answering on Stack Overflow :)  
CTFs (e.g. picoCTF: 400/16000)
